COMPLEX ALGEBRAIC SURFACES CLOSE TO THE BMY LINE

Özgür Kışisel

Middle East Technical University

Abstract

This will be an exposition of the work of Roulleau and Urzua on constructing examples of complex algebraic surfaces with controlled fundamental group, whose slopes are arbitrarily close to the BMY line.

Date : Friday, August 10, 2018

Time: 11:00

Place: IMBM Seminar Room, Boğaziçi University South Campus
