Workshop on Banach Algebras in Honour of Ali Ülger

Monday

14.00: Betül Tanbay (Boğaziçi University) *Opening Talk*

15.00: Eberhard Kaniuth (Universität Paderborn) *The structure of power bounded elements in Fourier-Stieltjes algebras of locally compact groups*

Tuesday

14.00: Anthony Lau (University of Alberta) *Fixed point set for semigroup of mappings and harmonic analysis*

15.00: Garth Dales (Lancaster University) *BSE norms and BSE algebras*

Wednesday

14.00: Ali Ülger (Boğaziçi University) *Sets of Spectral Synthesis: A Short Survey and Some Recent Results*
Note: This talk is a departmental colloquium talk and will be given at the Boğaziçi University Mathematics Department.

Thursday

14.00: Nico Spronk (University of Waterloo) *Idempotents, topologies and ideals*

15.00: Mahya Ghandehari (University of Delaware) *Does $\ell_w^1(S)$ have stable character property?*

16.00: Ebrahim Samei (University of Saskatchewan) *Twisted Orlicz algebras*

Date : April 11, 12, 13, 14, 2016
Place : IMBM Seminar Room, Boğaziçi University South Campus (excluding Wednesday)
