MINI WORKSHOP ON SYMMETRIES IN M-THEORY

16-20 July 2007

Program

Monday, 16 July 2007

Murat Günaydın (Penn State Univ.)

"Singletons, doubletons and $Osp(32/1)$ "

Tuesday, 17 July 2007

Francois Englert (Univ. Libre de Bruxelles)

"Supersymmetry without supersymmetry and quantum gravity"

Wednesday, 18 July 2007

Kellog Stelle (Imperial College)

"U-duality orbits"

Thursday, 19 July 2007

Fabio Riccioni (Univ. degli Studi di Roma La Sapienza)

" E_{11} origin of gauged maximal supergravities"

Per Sundell at **14:00**

"Affine extension of AdS algebras and singletons"

Friday, 20 July 2007

Ergin Sezgin (Texas A&M Univ.)

"M-algebra re-visited"

There will be 1 formal lecture each day at 11:00-12:00 unless otherwise stated.

The afternoons are reserved for discussions and group study.
